

# You get more games, more fun, more computer uses with this new joystick

## AND THERE'S AN EASY WAY TO INPUT IT TO YOUR COMPUTER

You'll get a lot more fun out of your computer with this new joystick.

But note that it is not just an ordinary joystick — it is a *console*. It has a 2-axis joystick *and* contains a *speaker* and *speaker amplifier*. You can have *sound* with your games or, say, warning sounds in other applications. Or have your computer talk to you.

Gives you sound, too

Four pushbuttons

A third feature you get is *four pushbutton switches*. These give you even more possible uses such as selecting various colors on a color graphics terminal.

## EASY TO COUPLE

To couple the new joystick to your computer, just use our D+7A™ I/O board. It will couple not only one but *two* consoles to your Altair™

8800 or IMSAI 8080. And you'll still have several analog channels left over (and one 8-bit output port).

The D+7A plugs into the Standard 100 (S-100) bus of your Altair or IMSAI computer.

## EASY TO DISPLAY

Displaying the joystick outputs with the software below is also easy. Just use our TV DAZZLER™ board. It also plugs into the S-100 bus.

## NEW SOFTWARE

Here's some new Cromemco software for the joystick (to display, use DAZZLER interface):

**CHASE!** (2 persons, 2 joysticks): the cross chases the circle. The vertical bars move downward to add more fun to the chase. Score and remaining time kept automatically.

**TRACK** (1 person, 1 joystick): move the dot to the center of the spiral without touching the spiral's arms.

**DAZZLE DOODLE** (1 person, 1 joystick): lets you draw pictures in 4 colors on your color TV terminal using the joystick.

## STORE/MAIL

Cromemco wishes you more fun, more use from your computer. Get this new joystick console and other Cromemco peripherals at your computer store or order from the factory.

- Joystick console kit (Model JS-1K) .....\$ 65
