# Software Product Description

---

**PRODUCT NAME: DN61, Version 1, DECsystem-10 2780/3780 Emulator and Terminator**

**SPD 8.70.1**

## **DESCRIPTION:**

The DN61 emulates and/or terminates Model 76 DATA 100 units running 2780 Version 3, release 1 software and/or 3780 Version 1, release 3 software with the 2780/3780 features described below. (Equivalent units may also be utilized, but it is the customer's responsibility to prove equivalency.) The DN61 software enables a DECsystem-10 equipped with a DN20 or DN87 front-end to:

- submit 2780/3780 remote entry jobs to an IBM 360/370
- process jobs submitted from 2780/3780 terminals

## **Emulation Mode:**

In emulation mode, the DN61 connects a DECsystem-10 to an IBM 360 or 370. The DECsystem-10 appears to the IBM system to be a DATA 100 unit emulating an IBM 2780 or 3780 remote job entry station. The IBM 360 or 370 system must be running one of the following:

- OS/VS2 (SVS) HASP II Version 4
- OS/VS2 (MVS) JES2
- OS/MVT HASP II Version 3.1
- OS/MVT ASP Version 3.1
- OS/VS2 (SVS) Version 3.2

A DECsystem-10 user can submit a disk file containing IBM JCL and ASCII data to the IBM system as a batch job. The DN61 translates the data to the IBM system as a batch job. The DN61 translates the data to EBCDIC before transmitting the job to the IBM system. Any output data returned to the DECsystem-10 is translated to ASCII and printed. In emulation mode the DN61 does not handle special forms.

When connected to an OS/VS2 (SVS) HASP II Version 4 or an OS/VS2 (MVS) JES2 system, the DN61 allows the DECsystem-10 user to route output from the IBM system to a given disk area on the DECsystem-10.

## **Termination Mode:**

In termination mode, the DN61 connects a DECsystem-10 to a Model 76 DATA 100 running either 2780 or 3780 software as mentioned above or equivalent units. (It is the customer's responsibility to prove equivalency.) The 2780/3780 remote station user submits a DECsystem-10 batch control file from the remote station's card reader. The DN61 returns any job output to the remote station for printing on its printer.

The DN61 supports a maximum aggregate termination rate of 100K baud from up to 6 synchronous communication lines. The lines can range in speed from 2.4K baud to a maximum of 56K baud. The lines can interface to:

- Bell System 201C modems at 2.4K baud
- Bell System 208A or 208B modems at 4.8K baud
- Bell System 209A modems at 9.6K baud
- ICC COMLINK II modems at 19.2K baud
- Bell System 303 modems for speeds in excess of 19.2K baud

Equivalent modems can also be used, however, it is the customer's responsibility to prove equivalency.

## **MINIMUM HARDWARE REQUIRED:**

Any valid TOPS-10 Version 6.03 configuration with:

- KL10- or KI10-based DECsystem-10
- DN20 or DN87 front-end

## *Communication devices*

Up to 6 synchronous line interfaces per DN20 or DN87

## **OPTIONAL HARDWARE:**

None

## **PREREQUISITE SOFTWARE:**

TOPS-10 DECsystem-10 Operating System, Version 6.03 or later

## **OPTIONAL SOFTWARE:**

None

## **TRAINING CREDITS:**

None

## **SUPPORT CATEGORY:**

B — Software Support will be provided as stated in the Software Support Categories Addendum to this SPD.

## **UPDATE POLICY:**

Software Updates, if any, released by DIGITAL during the one (1) year period following installation, will be provided to the customer without additional charge (includes no installation). After the first year, updates,

-2-

if any, will be made available according to then prevailing DIGITAL policies.

#### ORDERING INFORMATION:

All binary licensed software, including any subsequent updates, is furnished under the licensing provisions of DIGITAL's Standard Terms and Conditions of Sale, which provide in part that the software and any part thereof may be used on only the single CPU on which the software is first installed, and may be copied, in whole or in part (with the proper inclusion of the DIGITAL copyright notice and any DIGITAL proprietary notices on the software) only for use on such CPU. All source licensed software is furnished only under the terms and conditions of a separate Software Program Sources Agreement between Purchaser and DIGITAL.

The following key (F, M, P) represents the distribution media for the product and must be specified at the end of the order number, e.g., QH061-XM = sources on 1600 bpi 9-track magnetic tape.

F = 7-track Magnetic Tape

M = 1600 bpi 9-track Magnetic Tape

P = 800 bpi 9-track Magnetic Tape

#### Standard Options

- DN61 -X— IBM 2780/3780 Front-End Communication Subsystem
- QH061 -X— Single-use license, source license, sources, documentation, support services (media: F, M, P)
- QH061 -U— Armed services procurement regulation license, sources, documentation, support services (media: F, M, P)

#### ADDITIONAL SERVICES:

- QHK01 -K— Distribution Service (media: F, M, P)
- QHK01 -Z— Armed services procurement regulation distribution service without support services (media: F, M, P)
- QHK02 -K— Distribution service with support services (media: F, M, P)
- QHK02 -Z— Armed services procurement regulation distribution service with support services (media: F, M, P)

#### ADDENDUM

##### SOFTWARE SUPPORT CATEGORIES

Each software product (hereinafter 'SOFTWARE') with a designated Support Category A or B in the applicable Software Product Description (SPD) existing at the time of order will be the current release at the time of delivery and will conform to the SPD. DIGITAL's sole obligation shall be to correct defects (nonconformance of the SOFTWARE to the SPD) as described below. Any SOFTWARE with a designated Support Category C will be furnished on an 'as is' basis.

For SOFTWARE with a designated Support Category A or B, DIGITAL will provide the services set forth below without additional charge.

##### CATEGORY A

1. Upon notification by customer to the nearest DIGITAL office that the computer system, including all required prerequisite hardware and software, is ready for the installation of the SOFTWARE, DIGITAL will install such SOFTWARE in any location within the contiguous forty-eight (48) United States, the District of Columbia, or a country in which DIGITAL or a subsidiary of DIGITAL has a software service facility. The notification must be received by DIGITAL and the system must be ready for installation within thirty (30) days after the delivery of the SOFTWARE to customer or DIGITAL will have no obligation to install. Installation will consist of: (1) verification that all components of the SOFTWARE have been received by customer, (2) loading the SOFTWARE, and (3) executing a DIGITAL sample procedure.
2. During the ninety (90) day period after installation, if the customer encounters a problem with the current unaltered release of the SOFTWARE which DIGITAL determines to be a defect in the SOFTWARE, DIGITAL will provide the following remedial service (on site where necessary): (1) if the SOFTWARE is inoperable, apply a temporary correction (TC) or make a reasonable attempt to develop an emergency by-pass, and (2) assist the customer to prepare a Software Performance Report (SPR) and submit it to DIGITAL.
3. During the one (1) year period following installation, if the customer encounters a problem with the SOFTWARE which his diagnosis indicates is caused by a SOFTWARE defect, the customer may submit an SPR to DIGITAL. DIGITAL will respond to problems reported in SPRs which are caused by defects in the current unaltered release of the SOFTWARE via the Maintenance Periodical for the SOFTWARE, which reports SPRs received, code corrections, temporary corrections, generally useful emergency by-passes and/or notice of the availability of corrected code. Software Updates, if any, released by DIGITAL during the one (1) year period, will be provided to the customer on DIGITAL's standard distribution media as specified in the applicable SPD. The customer will be charged only for the media on which such updates are provided, unless otherwise stated in the applicable SPD, at DIGITAL's then current media prices.

##### CATEGORY B

During the one (1) year period following delivery, the services provided to the customer will be the same as set forth in 3 above.

##### CATEGORY C

SOFTWARE is provided on an 'as is' basis. Any software services, if available, will be provided at the then current charges.

DIGITAL shall have the right to make additional charges for any additional effort required to provide services resulting from customer use of other than current unaltered release of the SOFTWARE operated in accordance with the SPD.
