TITLE EDGE CONNECTOR CONTACTS ON PCBA ASSEMBLIES-COLOR OF				PIB NO. DK3044
PRODUCT LINE:	TAPE DISK FORMATTER X	EQUIPMENT CHANGED N/A	MODEL SERIES AFFECTED D3000	EFFECTIVE DATE 30 July 1975
CLASS OF BULLETIN:		ORDER, PART KIT NO.	EFFECTIVITY	
<input type="checkbox"/> IMPROVEMENT <input type="checkbox"/> RETROFIT ON FAILURE <input type="checkbox"/> RETROFIT RECOMMENDED <input checked="" type="checkbox"/> SERVICE INFORMATION ONLY		N/A	N/A	
<p><u>PURPOSE:</u> To inform customers of variations in the color and metal content of contact surfaces of edge connectors on Printed Circuit Board Assemblies (PCBAs).</p> <p><u>INFORMATION:</u></p> <ol style="list-style-type: none"> For approximately a year we have been providing a few PCBAs used on Formatters with Gold Planted contacts. Prior to this we had used the silver colored, Nickel Rhodium plated contacts. Both methods have proven highly satisfactory. The more recent gold plated ones were thoroughly tested. They withstood 500 insertions and withdrawals with no significant wear resulting. In the future you may notice either the silver colored nickel rhodium or the gold plated contacts on any and all of our PCBAs. The differences will cause no practical or functional impact on the operation of any equipment. The chief difference is the color.
